

Single Origin Drip Filter Coffee

What is Drip Filter Coffee

Drip filter coffee is a non-pressurised, soft brew method of making coffee. The method accentuates intricate flavours when compared to other brewing methods. This makes it a popular choice for single origin coffee, since it allows the flavours and aromas to shine.

Variety

Our current single origin variety is **Ethiopian Sidamo**
This has been specifically developed for drip filter brewing

Our Drip Filter product

This product is exclusive to Procope Workplace Catering Customers and was developed to provide ready to drink coffee for larger meetings or functions

When you order a Single Origin Drip Filter product from us you'll receive a freshly brewed 2L canister which is enough for around 10 coffees. If you need more, we can supply an additional canister. The coffee is ready to drink & keeps hot for up to 3 hours.
We also supply tasting notes to help educate your drinkers

Benefits

1. **Perfect for larger meetings (10+ people).** No need to make multiple espresso or 'pod' coffees or continuously refill plungers
2. **No mess.** (i.e. no spent coffee grounds or used pods to dispose of)
3. **Cost effective.** A 2L canister costs \$5 or \$0.50 per 200ml cup*. This compares well with other methods:
Espresso or Pod - \$0.80 - \$1.00 per cup
Plunger \$0.50 per cup
*with any food catering order

HUMMINGBIRD
COFFEE ROASTERS

About Ethiopian Coffee

Ethiopia is the 5th largest coffee growing region in the world, producing around 400,000 tonnes annually

Sidamo green coffees are grown on mountainside 'fincas' (farms) at 1500 – 2200 metres above sea level in the Ethiopian Highlands
